THE MUST HAVE ANTIDOTE FOR THE MANAGEMENT OF
**ANTICOAGULANT RODENTICIDE
POISONING**

HEMOPHYT®

WHAT IS ANTICOAGULANT RODENTICIDE POISONING?

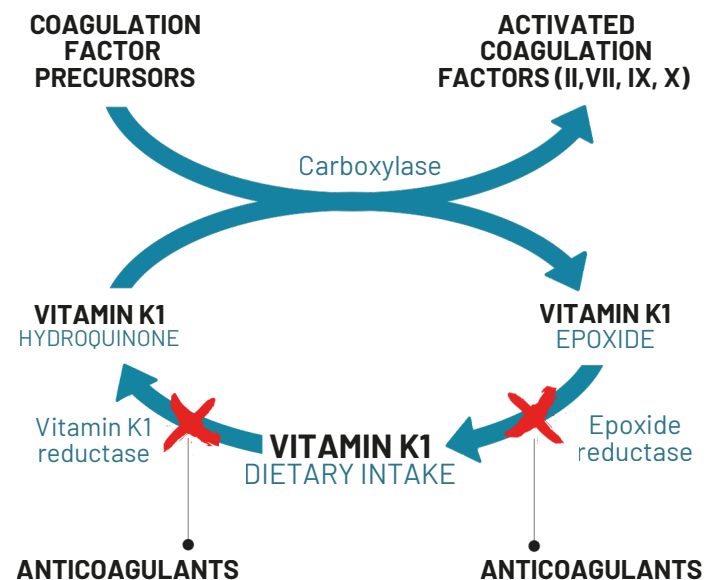

Anticoagulant rodenticides block vitamin K1*-dependent coagulation.

The variety of rat poisons available on the market (and the differences in their active substances) means that each has a distinct toxicity profile. In addition, patients may present at different stages of toxicity - ranging from a recent ingestion to an active bleeding episode. Fortunately, anticoagulant rodenticides are among the rare toxicities for which an antidote exists.¹

*VITAMIN K1 = PHYTOMENADIONE

Phytomenadione is the active substance in Hemophyt, essential for the synthesis of vitamin K-dependent coagulation factors and the maintenance of the vitamin K1 cycle.

THE ACTION OF ANTICOAGULANT RODENTICIDES ON THE VITAMIN K1 (PHYTOMENADIONE) CYCLE

VETERINARY DRUG

Dômes Pharma brings you the only veterinary-licensed Vitamin K1 tablets for dogs, helping stabilise your patient's coagulation until they can recycle Vitamin K1 themselves.

PrHemophyt®* should be administered within 12 hours following emergency intravenous vitamin K1 treatment. Or, it may also be administered alone in the management of subclinical coagulopathy resulting from anticoagulant poisoning.

It is recommended to continue administration until coagulation time has normalized (when PT values are no longer elevated).

Emergencies won't wait!

**BE READY IN CASE OF
ANTICOAGULANT POISONING
with our PrHemophyt® Vitamin K1
tablets.**

PrHemophyt® 50mg (12x7 tablets)

- 50 mg of phytomenadione per tablet.
- Scored so can be divided into quarters.
- Licensed for oral use at 5mg/kg/day.
- Give 30 to 60 minutes after a meal.
- 1 tablet per 10kg per day.
- Available in packs of 12x7 tablets.

*PrHemophyt®: For veterinary use only. To be used exclusively by, or on the prescription of, a licensed veterinarian. Refer to the product label for complete product information. Veterinary drug DIN 02539314

PREPARED FOR POISONING BE PREPARED FOR POISONING

As a European leader in poisoning management, Dômes Pharma supports veterinarians by helping them provide fast and effective care in cases of poisoning, thanks in particular to:

- A unique range of essential and innovative products.
- Comprehensive support in poisoning management, including technical decision-making tools and practical guidelines for managing poisoning cases.
